Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Friday 14 May 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy with hill fog and drizzle, brighter later.

Today:
Cloudy, misty and cool this morning, with hill fog over higher ground and some outbreaks of drizzle at times. Cloud breaking this afternoon with some bright or sunny spells developing. A chance of the odd light shower later. Maximum temperature 12 deg C (54 deg F).

Tonight:
Becoming increasingly cloudy for most again overnight, as an area of low cloud and patchy rain arrives from the southwest. Rain may become organised and heavy by dawn. Minimum temperature 4 deg C (39 deg F).

Saturday:
Mostly cloudy to start, with patchy outbreaks of rain across the south of the area. A further risk of showers developing from late morning into the afternoon, these possibly thundery. Maximum temperature 13 deg C (55 deg F).

Outlook for Sunday to Tuesday:
Cloudy and cool initially with patchy rain or showers developing. Likely becoming brighter into next week but with further showers or thunderstorms. Slight frosts possible in rural locations.
